COMMUNITY NEWS

MAY 2002

## President's Message

Finally, spring has arrived. After a somewhat long winter, it is time to get outside, prepare your gardens, hook up the barbeque and enjoy summer with your friends and neighbors in the community.

As we enter into the summer months, I would like to inform you of a few of the projects that the Mount Royal Community Association Board will be working on.

- Fundraising for and designing a new playground
- Resurfacing the Tennis Courts
- Planning Fiesta Night at Mount Royal Station for June 14th
- Gathering sponsors for the new bus benches
- Attracting new Board Members
- Continuing our membership drive
- Implementing many of the planned traffic calming measures

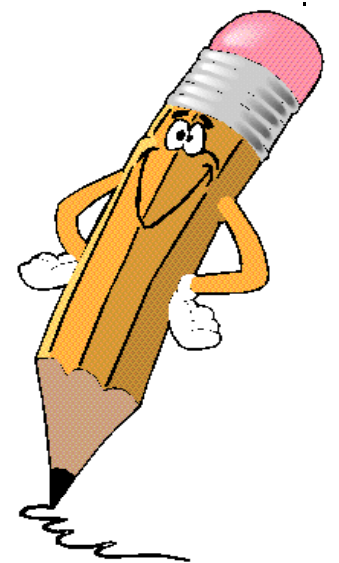

It is also the time of the year that I would like to remind all residents to play an active role in their neighborhood by reporting all criminal incidents to the police (please see John McCormick's report inside), by always cleaning up after your pet, by driving with care, by informing your neighbors of future renovation plans and by

informing your neighbors of your vacation plans. It is with these small contributions among others, that contribute to a peaceful and safe place to live.

And finally, if you have not already done so, please remember to fill out the membership form on the back page of this newsletter to join the Community Association. Of 800 single family homes, we have only received 298 memberships. Your support is invaluable.

I invite you to come out to Fiesta Night for some Margaritas and Tapas on Friday June 14th at 7:30pm.

# Neighborhood Chatroom

## CALL THE POLICE

Last spring, as my contribution to the community newsletter, I wrote a piece in which I discussed three then recent acts of vandalism committed at the community association building and playground. In that piece I asked, "what were they thinking" as I reported that among other nasty acts, someone set fire to the slide in the playground.

That article attracted quite a few comments from neighbors over the following weeks as I learned about egging, car prowling, car window smashing, tossing a planter through a front window and minor vandalism from a host of neighbors. I also learned that the Earl Grey School was also the target of some unfortunate activities including the frequent despoiling of the schoolyard with broken beer bottles. When I discussed these events with the affected residents, I found that often they not reported to the police.

As the Police allocate manpower based on perceived problems in the communities, reporting the incidents will lead to an increased presence, which we hope will have a calming influence. To reduce the impact of the problem we would like to encourage all residents to report these events to the Police through the 266-1234 non-emergency line.

Report Vandalism  
Damaged Street Signs  
Graffiti  
Personal Property  
No Matter How  
BIG or SMALL  
Call the Police 266-1234

---

The reason why I thought that it was timely to raise this topic is that during the afternoon of March 8, 2002, a 12 year old boy was accosted and robbed by a group of high school aged boys while attempting to cross the Earl Grey School yard on his way to the Glencoe Club. One of the high school aged boys is reported to have demanded \$5 to allow the younger boy to cross their turf. The lone 12 year old had no money but was deprived of \$40 of Cineplex movie coupons before being allowed to proceed. This incident was immediately reported to the Police and an identification of one of the high school aged boys has been made. I would like you to think about the implications of the next sentence. The robbery took place in daylight on a very cold day.

Next time you become aware of an incident, whether minor vandalism or something more serious, report it to the Police. Let's help make Mount Royal a safer place.

# Traffic Safety Report

## TRIAL MEASURES

We are expecting our trial measures to start going in over the summer. Elbow Park seems very impressed with the Traffic consultant that is helping them conjure up a plan that is acceptable to their community – so our measures should hopefully be put in front of Council soon.

At the meeting that was called by our Alderman to discuss traffic issues, I asked the City if they would describe our measures as too much or too little. Their response was that they felt our proposed measures fell right in the middle of these two extremes and that the City thought they were all quite reasonable requests considering the traffic levels in the community. Hopefully City Council will see it this way as well.

## 5TH AND 2ND STREET

The topic of the 2nd and 5th two-way conversion came up at the Alderman's meeting several times. Our Alderman stated that what happens to 5th Street and 2nd Street should be of no concern to Mount Royal residents and therefore

our Alderman would not allow Ma Halliday – the Project Manager of conversion – to speak on the issue of the ‘Open Discussion’. Our Alderman stated at the beginning of the meeting that the conversion funds were not available and that the project was too risky. During the course of the meeting the head of the City Planning Department clarified that all the funds were already earmarked and put aside for the project and after the meeting Martin Halliday stated that the City Planning Department considers the conversion to not have any risk associated with it.

Unfortunately our Alderman does not recognize that there are four parallel North-South roadways that are used to connect Elbow Drive to 17th Avenue – and our narrow residential 8th Street is one of them. Whatever happens to 2nd, 4th and 5th – has a huge affect on traffic on 8th. Our community traffic proposals should substantially reduce the afternoon commuter traffic that uses 8th Street but we are still left with the morning commuter traffic. The moving of one of the Northbound lanes from 2nd Street over to 5th Street, combined with the 40 km/hr signs and other measures on 8th Street, should go a long way towards solving our morning problems on 8th and also relieve the congestion around the Glencoe in Elbow Park.

## INNER CITY TRAFFIC STUDY

The recommendations contained in the ‘Inner City Traffic Study’ will reduce our ability to cut through other communities to get around the ‘Inner City’. The recommendations also allow for modifications that will increase the efficiency of the existing large roadways in the Inner City. It is these large roadways that we share with the commuters trying to get to work downtown. Residents of the Inner City pay the biggest price – reduced mobility – but we also get the biggest benefits –less traffic on the back streets.

...CONT'D ON PG7

---

# Traffic Safety Report...CONT'D FROM PG6

The commuter's benefit by the greater efficiency of the larger roadways.

So when your commuting coworkers from the South start complaining about the Inner City Plans, please make sure they understand them.

## PREMIER WAY BIKE PATH

We are hoping that the pedestrian/bike path on the South side of Premier Way – between 7th and 10th Street – that was proposed and approved by both Mount Royal and Elbow Park – eventually makes it into the City plans. I am sure that we have all seen children and parents cautiously walking or cycling in the road with all the cars zipping past because the City has never provided sidewalks in this area. We are hoping that the sewer project goes ahead so that we can piggyback on that project to get these improvements.

## SCHOOL CROSSWALKS

The province has changed the rules concerning school crosswalks. The Grade 6 children with the STOP signs and the bright orange vests are not allowed to go out into the roadway; they must remain on the curb during the crossing process. This means that the shorter, younger, less visible students get sent out into the roadway unescorted.

There are three things that we can do to help reduce the risks at these crosswalks:

- 1) As drivers we need to be aware that the crossing guards are not going to escort the kids into the roadway, so PLEASE watch for the kids and don't expect to see that orange wrapped big kid with the sign out in the middle of the roadway.
- 2) As parents we should not send the young ones alone to cross at these crossings. Plus we should choose bright colours for our kid's coats.
- 3) The community association has spoken to both Earl Grey and William Reid Schools about this issue. It is out of the schools control, however, we are going to request that the City make the existing trial road narrowing at the crosswalks on Council Way and Hillcrest – permanent – plus we are planning to request the same treatment

of the crosswalk on 8th Street by Earl Grey School. In the last City Council Traffic Meeting, the use of raised crosswalks was approved by City Council. We would love to be the trial community for these measures. A few calls from worried parents to our Alderman may expedite this request.

## LOWER MOUNT ROYAL

Occasionally our community association and traffic committee gets complaints from Lower Mount Royal residents that their traffic problems and other issues do not get addressed. For issues to be addressed, they must first be defined and communicated. If your street has a problem or a request, get a few of your neighbors to agree with you and then send us an email with the problem defined. Then we will address it.

## 40 KM/HR SIGNAGE

We have not heard anything from the City on this topic.

# From Your Alderman

The ward 8 office is even busier than could have been imagined!

On the Finance and Budget committee and special sub-committee, budget finalization is April 30. That's when the tax rate will be set for this year, and current indications are that any increase will be less than 3%. That percentage number actually refers to the effect on the City, and will mean less than a 3% tax increase to each homeowner whose property tax assessment has not changed since last year. That will also be about the same date Council votes on whether or not Enmax should be sold.

The ward 8 presidents and community planning development directors came together in March to share views on their visions for their communities and share some best practices and worst challenges. Our communities are very diverse and it's helpful to understand the wide range of issues.

Let's hope spring is on its way. You gardeners in our midst provide each of us with real joy as we walk down our streets noticing your brave early flowers bringing sparks of colour as they poke their heads out of the ground to welcome the warmer weather.

*Are you interested in learning about the Planning process? Like to contribute some volunteer time for the Mount Royal Community Association?*

Brian Ireland, the Director of Planning, is looking for some new members for the Development Review Committee of the Mount Royal Community Association. The Committee meets once per month on the last Wednesday of the month at the Mount Royal Station, 2317-10th Street SW (the community building). The City circulates to the Community Association all developments in Mount Royal and Lower Mount Royal as part of the planning process. The Committee reviews these proposed developments and comments to the City planners as to how they fit into the community.

INTEGRATIVE HEALTH INSTITUTE  
New Health Partner  
– Stay Healthy, Stay Informed

Calgary has a new health partner, the Integrative Health Institute of Calgary. This non-profit organization has been established to provide quality health information that blends both conventional and complementary therapies. The Institute is partnered with the Calgary Health Region and has gained recognition for helping people find information on natural therapies and evidence-based research. They do not supply medical treatment.

The Institute, which is located at the Holy Cross Centre, welcomes everyone to use the free library resources. The multi-media library is the first of its kind in Canada with over 1200 resources on complementary and alternative health. The library is unique as it identifies the scientific merit and credibility of each resource on the shelf from high to low evidence. In other words, you can find all the information you require at a glance. The entire library catalogue is also online. Please log on to their website at [www.integrativehealth.ca](http://www.integrativehealth.ca) or watch CFCN “Health Watch” for more information.

---

The Institute’s professional staff of health educator’s can also help you. Their goal is to support you regarding personal health issues; such as MS, Cancer, Arthritis, Obesity, Hypertension and Diabetes. If you would like an appointment with a health educator you can call (403) 209-1777. The Institute offers a unique learning experience called the Health Journal<sup>®</sup>. This is a 1.5-hour session in which a health educator helps you create a personal health vision while listening to your concerns and information needs. This service includes the Health Index<sup>®</sup> which is a mini-directory of reliable materials that you can use from your own home or office computer. This complete service is \$40 (+GST). If you would like to know more about a topic related to complementary and alternative health you might wish to attend one of the Institute’s professional workshops. Topics include an overview of therapies such as acupuncture, herbology, nutrition, and stress reduction, biofeedback and energy medicine. Please drop by the Institute or call for more information.

## CAN TABS – FOR DIABETIC CHILDREN

The Calgary Heritage Lions Club is asking for your help with the collection of can tabs and clean aluminum (aluminum foil, pie plates etc.).

Monies raised through the pop tab project are used to sponsor or partially sponsor children to attend diabetic camp; where they realize they are not the only ones with diabetes. They learn how to control their disease through their diet and exercise. They also learn that they can still lead a normal life if they know and understand their limitations. These children have to monitor their blood sugar levels up to six or more times a day, and give themselves injections of insulin.

One week at camp costs \$475. This covers the hiring of a qualified nurse, dietician, counselors, food, etc. The Alberta Children's Hospital Diabetic Unit staff has criteria the patients and families must meet before the children receive sponsorship. This is handled entirely by the hospital.

It takes 1,350 tabs to make one pound of aluminum which nets \$.45 a pound. Since 1992 with the help of individuals, schools, office staff, organizations in Calgary and throughout the Province, the Calgary Heritage Lions have donated approximately \$40,000 to the Alberta Children's Hospital – Diabetic Outpatient Clinic. 100% of the proceeds realized is for the diabetic children. Each tab makes a difference. With your help more children can go to camp, have fun and learn how to cope.
