NOVEMBER • DECEMBER 2007

PRESIDENTS MESSAGE

What an exciting month we have had! The Executive held its second Town Hall or Open House in October. Rather than conduct Board business we had an open forum discussing issues that affect us as residents. The purpose was to gather information for next year's Board as we plan for the future. Our concerns were heard by Aldermanic and Mayoral candidates: Steve Chapman, Madeleine King, John Mar and Alnoor Kassam. We appreciate their time and attention five days prior to the election.

The Mount Royal Community Association welcomes John Mar as our new Alderman and we sincerely thank Madeleine King for her years of dedicated service to our community. Ours is a true democratic vote and we are grateful to all the candidates who put their names forth, giving us so many choices.

The next important vote is the Annual General Meeting on November 21st at 7:30 pm at the Mount Royal Station. We welcome your input and your attendance.

At the AGM I will address some of the concerns that were brought up at the Open House as well as Western Canada High School issues.

See you at the AGM and thank you for your support!

Sincerely,
Marla Klassen

COME TO THE ANNUAL GENERAL MEETING

18 September, 2007.

In accordance with the Bylaws of the Mount Royal Community Association (MRCA), you are hereby notified that the Annual General Meeting of the Association will take place on Wednesday, November 21st 2007 at 7:30 pm at the Mount Royal Community Station, 2317 10th Street SW. The agenda on the 21st will include the following:

1. The approval of the minutes of the previous AGM.
2. President's report of the activities of 2006/7.
3. The Treasurer's Report and the presentation of the Audited Financial Statements.
4. Nomination of Officers for the 2007/8 term.
5. Election of Officers for the 2007/8 term.
6. Appointment of Auditors for the ensuing year.
7. Other business of the Association.

Thank you for your support of the MRCA. Your support is valued and I would encourage you to get involved in the upcoming year which will be one of fewer veteran volunteers serving the executive of the MRCA.

I look forward to your attendance at the AGM next month and until then we'll see you in the neighbourhood.

Marla Klassen
President

TRAFFIC ARTICLE

In this article I want to bring you up to date with the working of the Mount Royal Traffic committee. As I have reported in past articles, we have established as a priority the need to move forward with the traffic calming program for Mount Royal. It is easy to look at these traffic calming measures and take the position that all this work and fuss is unnecessary – however if you happen to live in an area of Mount Royal where traffic volumes and cut-through traffic continues to be a major concern, I know that your views would change. For example did you know that traffic counts are approaching 6000 vehicles per day in areas where folks use our streets to avoid the congestion on 17th Ave SW and other local collector roadways? I am sure that you would agree that these high volumes and the unacceptable driver behaviour that seems to go hand in hand with cut-through traffic is unacceptable. As was mentioned in a previous article, the belief that I am sure we all subscribe to is the idea that cut-through traffic, especially high volumes and speed downgrades the quality of the community, its desirability for families and ultimately property values. It was therefore very reassuring to see our neighbours taking up the cause and demanding action from the City. This article chronicles such an action, which should serve as an example of what each of us can do to address this important issue. The following letter to the manager of Transportation for the City of Calgary requests action – please do your part by calling the City and the elected representatives demanding action so as to provide for safe streets, improved quality of life and the preservation of the unique character that makes Mount Royal a special place. Please refer to the website www.mountroyalstation.ca for traffic statistics and a letter to the manager of Transportation for the City of Calgary which requests action--please do your part by calling the City.....etc....

CURRIE BARRACKS DEVELOPMENT - FALL REPORT

Madeleine King

In the very near future you will be hearing more about a traffic study that will affect the communities of Rutland Park, Richmond, Killarney/ Glengarry, Lincoln Park and South Calgary/ Altadore/ Garrison Woods. The study will determine the changes in and the solutions for traffic issues that may arise when the Currie Barracks development is built.

When Council approved the latest plan for the CFB West development, we directed administration to look at how traffic will be impacted in these communities. This report will be presented to the LPT committee for approval in April 2008 and from there, will go to Council to be approved.

Although the CFB West is being designed as a pedestrian friendly community, it is important to also consider the increase in traffic to this area and the surrounding communities. A traffic management plan will be implemented to manage all modes of transportation and to minimize traffic conflicts. A study will be conducted within the boundaries 14th St West to 37th St West, from 26th Ave South to Glenmore Trail, west of Crowchild Trail, and from 26th Ave South to 50th Ave South, East of Crowchild Trail. This includes the communities of Rutland Park, Richmond, Killarney/ Glengarry, Lincoln Park and South Calgary/ Altadore/ Garrison Woods. Changes to traffic infrastructure to minimize the effects to the surrounding communities will come out of the information from this study.

The master plan for CFB West shows the development as a mixed use, sustainable community which combines an appreciation of the past and an excitement for the future. The 200 acre community will have an inner city character where residences and businesses will co-exist so that people can live, work and play all within the same community. A variety of homes will be built to accommodate different levels of affordability. It will be a pedestrian friendly development where streets, pathways and parks in the community will be designed to encourage people to walk, bike or take transit in an effort to increase safety, improve the environment and encourage healthy lifestyles. Parade Square will be an important focal point and the military legacy of the area will be supported with the preservation and rehabilitation of historic landmarks.

Although some traffic concerns have been identified in previous traffic studies, there is a still lot to learn about transportation concerns in this area. The process will include public input, data collection and analysis, and the development of traffic management strategies. The City will be looking to community traffic committees to provide feedback on current traffic concerns and there will be 3 public information sessions on the possible solutions. Please watch for notices about these sessions in the future so that you can take part in the process. Remember, Together Everyone Achieves More!

REGION COMMITTED TO HIGH-QUALITY CARE FOR NEWBORNS

J.P. and Karen Jepp hold their four identical baby girls.

It has been a few months since the Calgary Health Region was challenged to play a role in the care of J.P and Karen Jepp's identical quadruplet girls born on August 12th, 2007.

Safe, quality patient care is always the first priority of the Region. To aid in this priority, the Region participates in a network of sharing between level three Neonatal Intensive Care Units (NICUs) in Canada which allows them to assess and evaluate space availability when NICUs are at or near capacity. Level three units are reserved for babies, many of whom are born prematurely, requiring a high level of care and technological support. At the time of the girls' births, at 31 weeks and three days, there were not enough level three beds within the Region to accommodate the quadruplet's birth. Utilizing this network the Region was unable to find space within Canada and the decision was made to send the family to Benefis Hospital in Great Falls, Montana.

In a letter to the Region regarding their experience the Jepps family said "It was absolutely the right decision to send us to Montana," says J.P. "If you're thinking about the health of the four babies and the health of the mother, the beds were just not available. To be responsible, you've got to send them where the care is going to be

there.

Neonatal patients are monitored daily to assess their ability to be transported back to the Region when space becomes available. The Jepps were transported back to a Calgary hospital after spending less than a week in Montana. Now that Autumn, Brooke, Calissa and Dahlia are home with their parents in Calgary, the Jepps and their son are adjusting to life with a much larger family of four growing girls and appreciate the support the Region has given them.

"I do get smiles when I walk through the door," J.P. says. "Everybody knows who we are. The care has been top-notch. The prenatal care was absolutely fantastic and the care since they arrived here has been fantastic, too. The nurses are mother hens. They are absolutely fantastic."

BUILDING THE FUTURE OF HEALTHCARE – UPDATE ON THE SOUTH HEALTH CAMPUS

Crews began excavating the South Health Campus site in August, and the project is now entering its second official month of construction. Three hundred and ten thousand cubic metres of soil will be removed from the area; that's enough to fill over 150,000 half-ton trucks.

Foundation work is expected to begin in late October or November, once crews finish digging the six to nine metres for the parkade. At this point, foundation walls and footings for the parkade and main building will begin to be erected.

The South Health Campus will redefine the way health care is delivered within the community. The Campus will include a wide array of health services delivered in ways meant to optimize access to safe, patient centred care. At the same time, as a major hub for education and research, the facility will help train future health care providers to improve delivery of services in

order to meet the needs of patients. The campus will also focus on wellness by developing ways to help people onsite and in the community to maintain their own health.

Phase One will open in early 2011 with approximately 260 beds and will have the capacity to support 280,000 outpatient visits in the first year, eventually increasing to 432 beds and 400,000 outpatient visits. The following five to seven years will see additional beds and services added, until it is fully functional with 642 beds and the capacity to support 800,000 outpatient visits per year. The phased approach will ensure the Region has the trained people, services and programs in place to meet our growing population's needs to deliver safe, quality care.

The Calgary Health Region is committed to working with the community in dealing with any issues residents may have. If you have any questions or concerns, please contact the Project Office at 270-4780.

For more information on this and other Calgary Health Region capital projects, visit www.calgaryhealthregion.ca/capital

and to trauma centres in Edmonton or Calgary.

The network will also focus on injury prevention with an ultimate aim of reducing the number of injuries in Alberta. Data from the Provincial Trauma Registry will help the network determine the frequency of types of injuries across the province which will assist in focusing their awareness activities.

A future goal of the network and each trauma centre will to become accredited through the Trauma Association of Canada as a Canadian gold standard trauma system.

**NEW PROVINCIAL TRAUMA NETWORK
IS ANNOUNCED**

Along with eight other health regions in Alberta, the Region is participating in a new Provincial Trauma Network that will enhance care to critically injured patients. Alberta Health and Wellness announced a \$2 million contribution to the project in September, 2007.

The inspiration for the trauma network came nearly a decade ago from a group of health professionals in the field who wanted to improve communication and collaboration between trauma sites across Alberta. Participation in the network will have urban and rural health centres communicating to improve care to injured patients with faster and improved transportation to five new District Centres across the province

"Mastering the Art of Real Estate."

WHAT IS AN ESTATE PLAN?

Do you want to protect your assets for retirement? Minimize estate taxes? Avoid probate? Do you have a recreational property or business that you would like to succeed to your loved ones? A sound estate plan should encompass a multitude of elements that are tailored to your unique objectives. Although a will may serve as a wealth transference tool, it provides no tax planning benefits and can be easily contested. By properly utilizing the most effective estate planning techniques available, you can ensure that you and your family are secure now and for the future.

Want to know more? On Thursday, November 8TH, 2007 and Wednesday, February 6TH, 2008 at 7:00PM, MacMillan Estate Planning will be hosting a complimentary wine and cheese seminar. At these times, senior Trust and Estate Practitioner, Sheri MacMillan will offer advice and insight into all your estate planning inquiries.
